

Project 4: PHP App with MySQL, Multi-Stage Pipeline & Manual Promotion

Goal:

Deploy a PHP CRUD app with a MySQL DB. Use a Jenkins pipeline with staging to manual production promotion.

Requirements:

- Jenkins master: CentOS
- App servers: Ubuntu
- Jenkins agent handles deployment

Ansible roles:

- Install Apache + PHP
- Configure MySQL (users, schema, test data)
- Deploy PHP app

Artifact:

- Store builds in Nexus/S3
- Deploy selected version based on Jenkins parameter

Pipeline:

- Build, test, archive PHP app
- Manual promotion from staging to production
- App is accessible publicly over the internet (port 80)

Expected Output:

- Web page displays: "PHP CRUD App - Almost a DevOps Engineer!"
